RFM analysis segments customers based on three key metrics: Recency, Frequency, and Monetary Value. These metrics help businesses understand customer behavior and tailor marketing efforts effectively.

Recency (R)

- What it measures: How recently a customer made a purchase or interacted with the business.
- Why it's important: Recent customers are more likely to respond to promotions or offers,

Frequency (F)

- What it measures: How often a customer makes a purchase or interacts with the business.
- Why it's important: Frequent customers are more loyal. and ideal for upselling or retention campaigns.

Monetary Value (M)

- What it measures: How much money a customer spends within a given period,
- Why it's important: Higher spenders or more profitable and should be targeted with personalized offers

Possible Actions

No	Segment	Description	Action
1	Champions	Most loyal at valuable customers who frequently purchase and engage with your product.	Reward with loyalty programs, exclusive previews, or priority
2	Loyals	Regular customers who consistently engage with and purchase from your product.	Maintain engagement through personalized communication,
3	Potentials	Customers with growing interest and engagement, indicating a potential to become loyal.	Nurture with personalized offers, recognition and incentives
4	At Risk	Customers wirh reduced frequency of purchase or engagement, indicating potential churn.	Offer incentives such as loyalty rewards or exclusive promoti
5	Lost Customers	Customers who have completely stopped engaging despite prior activity.	Conduct win-back campaigns or surveys to understand reasc
